

Nezaal Ahmad

Delhi – 110025 | +91-9971698891 | ahmadnezaal19@gmail.com | [GitHub](#) | [LinkedIn](#)

Profile

3rd-year CSE (AI/ML) student at Galgotias University building full-stack systems end-to-end — from LLM pipeline architecture and async backend orchestration to React interfaces. Focused on building scalable, structured-output AI products for real-world deployment.

Technical Skills

AI / GenAI	Google Gemini API, Prompt Engineering, JSON Schema Constraints, PDF Ingestion Pipelines
Backend	Node.js, Express.js, REST APIs, JWT Auth, Controller-Service Architecture, Mongoose
Frontend	React.js (v19), React Router, Tailwind CSS, Vite, Sass, HTML5, JavaScript (ES6+)
Databases	MongoDB (subdocuments, data modelling), MySQL
ML / Data	Python, NumPy, Pandas, Scikit-learn
Tools	Git, GitHub, Postman, VS Code
Core CS	DSA, System Design, OOP, Computer Networks, OS, DBMS

Projects

SkillBridge AI — AI-Powered Job Preparation Platform [GitHub](#) [Live Demo](#) Mar 2026

React 19 · Node.js · Express · MongoDB · Google Gemini API · JWT · pdf-parse · Vite · Sass

- Architected a backend pipeline using Gemini (gemini-2.5-flash) with enforced JSON schema constraints, delivering structured interview reports — covering technical assessments, behavioural analysis, and skill-gap identification — with **100% schema-compliant outputs** across all LLM responses.
- Engineered a PDF ingestion pipeline using **pdf-parse** to extract and normalize unstructured resume content, enabling context-aware LLM evaluation against job descriptions and eliminating the need for manual data re-entry per session.
- Designed a JWT-based authentication system with secure token issuance, protected route middleware, and session-scoped report access — enabling personalized, user-isolated AI career roadmaps.
- Orchestrated a decoupled Controller-Service architecture to handle multipart form-data ingestion, concurrent async LLM calls, and MongoDB persistence — keeping report generation responsive under concurrent usage.

UniSphere — Event Infrastructure Platform [GitHub](#) [Live Demo](#) Nov 2025

React · React Router · Tailwind CSS · Node.js · Express.js · MongoDB · Mongoose · REST APIs

- Engineered a modular REST API layer handling full event lifecycle — CRUD operations, registration flows, and capacity management — with structured error handling and input validation across multiple endpoints.
- Shipped a fully responsive event discovery UI, with component-level code splitting to improve initial load performance; tested across a group of peers and classmates.
- Designed a Mongoose data model with subdocument-level registration tracking, enabling atomic updates and eliminating race conditions under concurrent registration requests.

Experience & Activities

Outreach Coordinator Sep 2025 – Oct 2025

IEEE Galgotias University Student Branch

- Led outreach operations for ICCSAI 2025 as part of a cross-functional team; secured multiple qualified sponsor leads via targeted cold-email campaigns and professional networking.

Education

B.Tech — Computer Science & Engineering (AI/ML Specialisation) 2023 – 2027

Galgotias University, Greater Noida *Coursework: DSA, DBMS, OS, Computer Networks, Machine Learning*

Certifications

Oracle OCI AI Foundations	Sept 2025	Verify
Google AI/ML Virtual Internship	Jul – Sept 2025	Verify
Guvi Data Science & Analytics	Jun 2025	Verify
